Subject Index

Ab initio
Methane elimination from ionized 1-butene, 315
Ab initio quantum chemistry
Gas phase nucleophilic substitution, 277
Actinides
Gas-phase chemistry of actinide ions: probing the distinctive character of the 5f elements, 1
Alkane elimination
Methane elimination from ionized 1-butene, 315
Aluminium
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327
Audio-frequency
Calibration of an audio-frequency ion trap mass spectrometer, 63

Binding energy
The binding energies of small Ar, CO and N_2 cluster ions, 175
Biomolecules
Coincidence studies of O_2^-, O^- and electron formation in electron-stripping of cationic biomolecules by molecular oxygen, 57
B3LYP calculations
Dissociation behavior of ionized valeramide. Part II. Theoretical exploration of the potential-energy surface, 129
Bond dissociation energies
Scandium ionization mechanisms in H_2–O_2–N_2 flames supported by calculated thermodynamic data, 339

Calixarenes
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
Cation radicals
Dissociation behavior of ionized valeramide. Part II. Theoretical exploration of the potential-energy surface, 129
Dissociation behavior of ionized valeramide. Part III. An unprecedented temperature effect on the C_3/C_2 branching ratio and its implications for metastable ion dissociations, 155
Cavitands
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
C–H bond activation
Dissociation behavior of ionized valeramide. Part I. Experimental studies, 105
Dissociation behavior of ionized valeramide. Part II. Theoretical exploration of the potential-energy surface, 129
$C_4H_8^+$
Methane elimination from ionized 1-butene, 315
Chemical kinetics
Chemical kinetics of scandium ionization in H_2–O_2–N_2 flames, 349
Chemi-ionization
Scandium ionization mechanisms in H_2–O_2–N_2 flames supported by calculated thermodynamic data, 339
Cluster
The binding energies of small Ar, CO and N_2 cluster ions, 175
Coincidence spectra
Dissociation behavior of ionized valeramide. Part I. Experimental studies, 105
Coincidence studies
Coincidence studies of O_2^-, O^- and electron formation in electron-stripping of cationic biomolecules by molecular oxygen, 57
Cross-sections
Calculated absolute electron impact ionization cross-section for the molecules CF_3X (X = H, Br, I), 53
Absolute total and partial electron ionization cross sections of C_2F_6, 365

Dendrimer conformation
Poly(propylene imine) dendrimer conformations in the gas phase: a tandem mass spectrometry study, 75
Density functional calculations
Density functional calculations on the loss of acetylene from the naphthalene radical cation, 269
Dissociation ionization
The binding energies of small Ar, CO and N_2 cluster ions, 175
Dissociation of the naphthalene radical cation
Density functional calculations on the loss of acetylene from the naphthalene radical cation, 269
Distonic ions
Dissociation behavior of ionized valeramide. Part I. Experimental studies, 105

PII S1387-8606(02)00580-8

Disulfide-bond structure
The use of multiple ion chromatograms in on-line HPLC-MS for the characterization of post-translational and chemical modifications of proteins, 37
Double cationization
Single and double cationization of organic molecules in SIMS, 213

Effluents analysis
Characterization of methyl orange and its photocatalytic degradation products by HPLC/UV–VIS diode array and atmospheric pressure ionization quadrupole ion trap mass spectrometry, 247
Electron impact ionization
Calculated absolute electron impact ionization cross-section for the molecules CF_3X (X = H, Br, I), 53
Electron ionization
Absolute total and partial electron ionization cross sections of C_2F_6, 365
Electronic structure
Single and double cationization of organic molecules in SIMS, 213
Electron-stripping
Coincidence studies of O_2^-, O^- and electron formation in electron-stripping of cationic biomolecules by molecular oxygen, 57
Energy distribution
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327

5f Elements
Gas-phase chemistry of actinide ions: probing the distinctive character of the 5f elements, 1
FAIMS
Application of mobility theory to the interpretation of data generated by linear and RF excited ion mobility spectrometers, 95
Flame ionization
Scandium ionization mechanisms in H_2–O_2–N_2 flames supported by calculated thermodynamic data, 339
Chemical kinetics of scandium ionization in H_2–O_2–N_2 flames, 349
Folding
Poly(propylene imine) dendrimer conformations in the gas phase: a tandem mass spectrometry study, 75
FT/ICR-MS
$Ga_{19}(C(SiMe_3)_3)_6^-$ as a precursor for pure and silicon-doped gallium clusters: a mass spectrometric study of a Ga_{13}^- and a $Ga_{12}Si^-$ anion, 383

Gallium cluster
$Ga_{19}(C(SiMe_3)_3)_6^-$ as a precursor for pure and silicon-doped gallium clusters: a mass spectrometric study of a Ga_{13}^- and a $Ga_{12}Si^-$ anion, 383
Gas isotope mass spectrometry
A method to induce and assess isotopic equilibrium of oxygen, 233
Gas phase
Chemical kinetics of scandium ionization in H_2–O_2–N_2 flames, 349
Gas-phase ion chemistry
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
N-Glycosylation
The use of multiple ion chromatograms in on-line HPLC-MS for the characterization of post-translational and chemical modifications of proteins, 37
Gridless
Improved method for designing a cylindrical Zhang–Enke ion mirror, 89

Hexafluoroethane
Absolute total and partial electron ionization cross sections of C_2F_6, 365
High-energy collisions
Coincidence studies of O_2^-, O^- and electron formation in electron-stripping of cationic biomolecules by molecular oxygen, 57
Host-guest complexes
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
HPLC/MS
Characterization of methyl orange and its photocatalytic degradation products by HPLC/UV–VIS diode array and atmospheric pressure ionization quadrupole ion trap mass spectrometry, 247

Ion chemistry
Calculated absolute electron impact ionization cross-section for the molecules CF_3X (X = H, Br, I), 53
Ion mirror
Improved method for designing a cylindrical Zhang–Enke ion mirror, 89
Ion mobility spectrometry (IMS)
Application of mobility theory to the interpretation of data generated by linear and RF excited ion mobility spectrometers, 95
Ion sputtering
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327
Ionization energy
The binding energies of small Ar, CO and N_2 cluster ions, 175
Ion–neutral complex
Methane elimination from ionized 1-butene, 315
Isotope amount ratio
A method to induce and assess isotopic equilibrium of oxygen, 233
Isotopic equilibrium of oxygen
A method to induce and assess isotopic equilibrium of oxygen, 233

Jellium model
$Ga_{19}(C(SiMe_3)_3)_6^-$ as a precursor for pure and silicon-doped gallium clusters: a mass spectrometric study of a Ga_{13}^- and a $Ga_{12}Si^-$ anion, 383

Kinetic energy release
The binding energies of small Ar, CO and N_2 cluster ions, 175

Lanthanides
Gas-phase chemistry of actinide ions: probing the distinctive character of the 5f elements, 1
LDI
$Ga_{19}(C(SiMe_3)_3)_6^-$ as a precursor for pure and silicon-doped gallium clusters: a mass spectrometric study of a Ga_{13}^- and a $Ga_{12}Si^-$ anion, 383
Light scattering
Calibration of an audio-frequency ion trap mass spectrometer, 63

Magnesium
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327
MALDI vs. ESI
Poly(propylene imine) dendrimer conformations in the gas phase: a tandem mass spectrometry study, 75
Mass calibration
Calibration of an audio-frequency ion trap mass spectrometer, 63
Mass spectrometry
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
Dissociation behavior of ionized valeramide. Part I. Experimental studies, 105
Dissociation behavior of ionized valeramide. Part III. An unprecedented temperature effect on the C_3/C_2 branching ratio and its implications for metastable ion dissociations, 155
Gas phase nucleophilic substitution, 277
Chemical kinetics of scandium ionization in H_2–O_2–N_2 flames, 349
Mass–energy analysis
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327
Metal ion chemistry
Gas-phase chemistry of actinide ions: probing the distinctive character of the 5f elements, 1
Mobility theory
Application of mobility theory to the interpretation of data generated by linear and RF excited ion mobility spectrometers, 95
Molecular dynamics
Single and double cationization of organic molecules in SIMS, 213
Monte-Carlo simulations
Single and double cationization of organic molecules in SIMS, 213

Nitrogenous salts
Thermal decomposition of nitrogenous salts under vacuum, 375

Organometallic ions
Single and double cationization of organic molecules in SIMS, 213
Oxides of nitrogen
Thermal decomposition of nitrogenous salts under vacuum, 375
Oxygen
A method to induce and assess isotopic equilibrium of oxygen, 233

Peptide mapping
The use of multiple ion chromatograms in on-line HPLC-MS for the characterization of post-translational and chemical modifications of proteins, 37
Photoaffinity labeling
The use of multiple ion chromatograms in on-line HPLC-MS for the characterization of post-translational and chemical modifications of proteins, 37
Physical organic chemistry
Gas phase nucleophilic substitution, 277
Plasma etching
Absolute total and partial electron ionization cross sections of C_2F_6, 365
Poly(propylene imine) dendrimer
Poly(propylene imine) dendrimer conformations in the gas phase: a tandem mass spectrometry study, 75
Polymers
Single and double cationization of organic molecules in SIMS, 213

Quadrupole mass spectrometry (QMS)
Thermal decomposition of nitrogenous salts under vacuum, 375

Reaction mechanisms
Gas phase nucleophilic substitution, 277
Reaction schemes
Density functional calculations on the loss of acetylene from the naphthalene radical cation, 269
Rearrangements
Dissociation behavior of ionized valeramide. Part II. Theoretical exploration of the potential-energy surface, 129
Dissociation behavior of ionized valeramide. Part III. An unprecedented temperature effect on the C_3/C_2 branching ratio and its implications for metastable ion dissociations, 155
RF-IMS
Application of mobility theory to the interpretation of data generated by linear and RF excited ion mobility spectrometers, 95

Scandium
Scandium ionization mechanisms in H_2–O_2–N_2 flames supported by calculated thermodynamic data, 339
Chemical kinetics of scandium ionization in H_2–O_2–N_2 flames, 349
Secondary ion emission
Energy distributions of secondary ions sputtered from aluminium and magnesium by Ne^+, Ar^+ and O_2^+: a comprehensive study, 327
Selected ion extraction
The use of multiple ion chromatograms in on-line HPLC-MS for the characterization of post-translational and chemical modifications of proteins, 37

SIMS
Single and double cationization of organic molecules in SIMS, 213
Single particle
Calibration of an audio-frequency ion trap mass spectrometer, 63
S_N1
Gas phase nucleophilic substitution, 277
S_N2
Gas phase nucleophilic substitution, 277
Solvent effects
Poly(propylene imine) dendrimer conformations in the gas phase: a tandem mass spectrometry study, 75
Sulfonated azo dyes
Characterization of methyl orange and its photocatalytic degradation products by HPLC/UV–VIS diode array and atmospheric pressure ionization quadrupole ion trap mass spectrometry, 247
Supramolecular interactions
Gas-phase interactions of calixarene- and resorcinarene-cavitands with molecular guests studied by mass spectrometry, 23
Synthetic isotope mixtures
A method to induce and assess isotopic equilibrium of oxygen, 233

Temperature effects
Dissociation behavior of ionized valeramide. Part III. An unprecedented temperature effect on the C_3/C_2 branching ratio and its implications for metastable ion dissociations, 155
Tetrafluoromethane
Absolute total and partial electron ionization cross sections of C_2F_6, 365
Thermal decomposition of salts
Thermal decomposition of nitrogenous salts under vacuum, 375
Thermodynamic data
Scandium ionization mechanisms in H_2–O_2–N_2 flames supported by calculated thermodynamic data, 339
Time-of-flight
Improved method for designing a cylindrical Zhang–Enke ion mirror, 89
Traceability
A method to induce and assess isotopic equilibrium of oxygen, 233

Vacuum decomposition
Thermal decomposition of nitrogenous salts under vacuum, 375
Valeramide
Dissociation behavior of ionized valeramide. Part I. Experimental studies, 105
Dissociation behavior of ionized valeramide. Part II. Theoretical exploration of the potential-energy surface, 129
Dissociation behavior of ionized valeramide. Part III. An unprecedented temperature effect on the C_3/C_2 branching ratio and its implications for metastable ion dissociations, 155
